

Mr. Kenneth A. Jacobson, Director
Repair and Alteration Division
Regional Public Buildings Service
General Services Administration
Washington, D. C. 20407

23 AUG 1978

Dear Mr. Jacobson:

STATINTL

This letter is in regard to construction funding of work presently being designed by [REDACTED] under the General Services Administration (GSA) Project GS-03B-79023.

By letter dated 25 August 1977 to Mr. James F. Steele, Jr., Mr. James McDonald, Director of Logistics, Central Intelligence Agency has assured GSA that Agency funds appropriated for this project are available for expenditure without regard to requirements of section 7 of the Public Buildings Act of 1959 as amended.

Attached hereto is an advanced copy of a Reimbursable Work Authorization Form 2957 which transfers construction funding in the amount of \$1,027,000 in fiscal year 1978. It is recognized that this amount may not be sufficient to cover the total project cost, and it is also recognized that planning and design may still be in such a stage that a total fixed price estimate is as yet unavailable. It is anticipated that the correct total amount required should be known in a time frame to supplement the amount forwarded under this action with additional dollars coming in the FY 1979 appropriation for this same project.

It is necessary to obligate these funds this year with the understanding that the additional funds as required will be made available in FY 1979 as described above.

Sincerely,

[REDACTED]

STATINTL

Chief
Real Estate and Construction Division, OL

WORK DESCRIPTION (continued)

dated 30 December 1976, transmitted \$108,200 for GSA A-E design services for this computer project. As authorization for this proposed two-phased design and two-phase construction computer center project is not considered a complete scope of work, the total negotiated amount of funds required by GSA for a firm, fixed-price project cost will be adjusted by the Agency through a supplementary amendment to this work authorization as necessary following on-going A-E planning and scope determinations.
